

3 Key Areas Being Addressed by Managed Wi-Fi

Creates an Enhanced Resident Experience—Starting on Move-in Day

- Enhanced Wi-Fi and cellular coverage throughout the community.
- Immediate activation and access. No “truck rolls” or phone calls required on move-in day for instant activation of Internet (and DIRECTV Stream).
- DIRECTV via Internet (Stream) available with multiple packages. No Satellite dishes or receivers. Each Set Top capable of: 4K Ready, Google Assisted Talking Remote, Mobile APP Included, Cloud DVR, 10 devices per set top box.
- **Residents will easily activate their own personal wireless network account on move-in day that works securely and seamlessly throughout the community, including their own in-unit Wi-Fi access point to ensure maximum bandwidth availability.**

Superior Network Quality and Availability

- Use of a low-latency, fiber-based circuit serving the community with a high-bandwidth fixed-point wireless backup in the event the primary fiber connection is severed.
- Redundant network paths throughout community to bypass individual switch failures and cable cuts.
- Commercial grade switches and wireless access points to improve individual device reliability.
- **Direct connection to most major bandwidth intensive sites like Netflix, Hulu, and others—bypassing the public Internet for unprecedented video streaming and gaming connections.**
